LEADERSHIP PROFILE

Strategic and results-driven Engineering Leader with 14+ years of experience in building distributed systems and 6+ years of leading high-performance engineering teams. Built engineering teams from scratch and scaled complex systems by 10x while delivering innovative, customer-centric solutions. Proven track record of achieving \$500K savings in annual infrastructure costs at Elevate K12. Adept at driving large-scale cross-functional initiatives, mentoring leaders, and fostering a culture of continuous improvement and technical excellence. An entrepreneurial leader adept at shaping product vision, mentoring future leaders, and fostering a culture of innovation and operational excellence.

EXPERIENCE

Director of Engineering 06/2023 - Present
Elevate K12 Bangalore, India

A teacher staffing company that enables high-quality LIVE teaching for every learner in the United States. Partners with schools and districts across the country to bring LIVE teachers into their classrooms.

- Scaled the engineering organization 3x, leading 4 cross-functional teams (30+ engineers) to drive product innovation and platform stability.
- Partnered with Product leadership to define and launch a suite of interactive classroom products, boosting student/teacher/coach engagement metrics by 30% while maintaining 99.99% platform availability during peak hours.
- Architected and executed a cloud optimization strategy that reduced annual infrastructure costs by 25% (\$500K), directly improving the company's gross margin.
- Improved system response times by 50% through enhancements in software architecture and server efficiency.
- Automated 40% of manual operational workflows leveraging technologies like Gen-AI, RAG and MCP.
- Owned the end-to-end engineering strategy for achieving SOC2 compliance, enabling the company to secure enterprise-level contracts and expand into new market segments.
- Led integration of 6+ third-party tools, including Zoom, Teams, Edlink, Classlink, Clever, Nearpod, OTUS and MagicSchool, enhancing product interoperability.
- Collaborated with the CFO for budget forecasting and to ensure tech capitalisation of engineering products.

Engineering Manager 05/2022 - 01/2023
Zepto Bangalore, India

The Fastest growing quick commerce company in India which offers an extensive range of 45K+ products, delivering across 50+ cities within 10 minutes.

- Recruited, mentored, and led a high-performing team of 11 engineers responsible for the core customer-facing experience (Search, Recommendations, Product Ranking & Pricing)
- Drove a 15% increase in AOV (Average Order Value) by collaborating with Product and Data Science to ideate and deliver key revenue-generating features, including Product Bundling, BxGy campaigns and a personalized catalog engine.

Co-Founder 04/2021 - 04/2022
RALLIB Bangalore, India

A digital publishing platform for Indian regional language publishers to host and sell their content online.

- Co-founded a digital publishing platform, defining the complete product vision, technical architecture, and go-to-market strategy.
- Recruited and led the foundational engineering and operations teams.
- Spearheaded business development, pitching to 100+ regional publishers to establish initial partnerships and secure content for the platform.
- Successfully launched the MVP on Android, and onboarded 5 initial publisher partners.

CORE COMPETENCIES & TECHNICAL SKILLS

- Technical Leadership**
Mentoring technical teams while driving innovation.
- Strategic Leadership**
Technical Vision & Roadmap, Business & Technology Alignment, Budgeting & Cost Management
- Product & Delivery**
Agile Methodologies, Product Strategy Collaboration, Stakeholder Management, SOC2/ISO Compliance
- Team Culture Building**
Building high-performance engineering teams from scratch
- Infra Cost Optimisation**
Reducing Cloud Infrastructure Cost to improve the bottom line
- Operational Efficiency through AI**
Incorporating GenAI into engineering products and processes to improve operational efficiency

TECHNICAL EXPERTISE

- Tech Architecture**
Cloud-Native Design · Microservices · Microservices · Event Driven Architecture · System Scalability & Resilience · Cloud Security & Compliance · LLM Engineering · Agentic Architecture · LLM Ops · RAG · MCP
- Languages & Platforms**
Python · Java · C# · .Net · Angular · React · Flutter
- Data & DevOps**
SQL/NoSQL Databases · CI/CD · IaC (Infrastructure as Code) · Observability

EXPERIENCE

Engineering Manager

03/2019 - 04/2021

[Myntra](#)

Bangalore, India

India's leading online destination for fashion, lifestyle, and beauty, which brings together the best of style, technology, and innovation to create a seamless shopping experience for customers.

- Led 2 teams consisting of 12 engineers to build a competitive analytics platform named Vorta.
- Built a crawl platform from scratch and scaled it by 10X to scrape 5M pages per day of leading fashion websites across the world.
- Achieved a 20% reduction in operational costs of Vorta by optimizing cloud resource utilization.
- Enhanced platform stability, resulting in a 25% reduction in system downtime.
- Introduced multi-cloud strategy to improve fault tolerance.
